CUSTOMER SERVICE PERFORMANCE REPORT

Reporting Period: October 2026
Prepared by: Virginiah Muthoni
Position: Business Operations Assistant
Date: 4 November 2026

1. EXECUTIVE SUMMARY

This report presents an overview of customer service performance at Zoe Tech Solutions during October 2026.

The report examines customer enquiries, response and resolution performance, challenges experienced and recommendations for improving service delivery.

A total of 120 customer enquiries were received during the reporting period, of which 96 were successfully resolved. This represents an 80% resolution rate.

2. INTRODUCTION

Customer service plays an important role in maintaining customer satisfaction and building positive business relationships.

The purpose of this report is to assess how customer enquiries were handled during October 2026 and identify areas that require improvement.

3. CUSTOMER ENQUIRY ANALYSIS

During the reporting period, the business received 120 customer enquiries through three communication channels.

The distribution was as follows:

Communication Channel	Enquiries
Email	50
Telephone	40

Social Media	30
Total	**120**

Email was the most frequently used communication channel, accounting for approximately 42% of all enquiries.

4. CUSTOMER SERVICE PERFORMANCE

Out of the 120 enquiries received:

- 96 enquiries were successfully resolved.
- 24 enquiries remained pending.

The overall resolution rate was 80%.

The average response time was approximately four hours.

These results indicate that most customer enquiries were handled successfully, although there is still room for improvement.

5. CHALLENGES IDENTIFIED

The following challenges were identified during the reporting period:

1. Delays in responding to some customer enquiries.
2. High volumes of enquiries during busy periods.
3. Incomplete information provided by some customers.
4. Delays in resolving technical support requests.

These challenges affected the speed and efficiency of customer service delivery.

6. RECOMMENDATIONS

To improve customer service performance, the following measures are recommended:

1. Establish clear response-time targets for customer enquiries.
2. Improve communication across email, telephone and social media platforms.
3. Provide additional training for customer support personnel.
4. Maintain accurate customer records for easier follow-up.
5. Monitor unresolved enquiries to ensure timely resolution.

7. CONCLUSION

The October 2026 customer service performance review shows that the business successfully resolved 80% of the enquiries received.

Although the overall performance was encouraging, improvements in response times, communication and follow-up procedures are necessary.

Implementing the recommendations outlined in this report will help improve customer satisfaction and strengthen service delivery.
